

GENWAL COAL COMPANY

TO: File

FROM: Jay Marshall

REFERENCE: Hawk and Eagle ground survey

DATE: 28 June 1991

On the morning of 28 June 1991 Randal Ralphs and Allen Childs conducted a ground survey looking for nesting Rapture. The survey was conducted along the stream 1/2 mile above and 1/2 mile below the location to be blasted. No raptures were observed nesting or in flight.

Bill Bates reported to Paul Baker (DOGM) that there were no active eagle nest in Crandal Canyon. This ground survey was to further substantiate the findings of the aerial survey.
